

LAVAsniel welding blankets protect your valuable equipment and ProPertY against unnecessary exposure to flame, spatter, heat, and molten metal splash.

Weldas LAVAshield blankets are made using fiberglass fabric that is coated on each side with Acrylic or Neoprene coatings. The coatings enhance the fabrics inherent heat-resistance to abrasion, chemicals, oil, and weather. The blankets are hemmed on all sides with Dupont **KEVLAR** thread that is double locked stitched and large brass grommets are added for extra durability and easy handling.

30 Oz. Gold Fiberglass
Acrylic / Neoprene
coatings
Temp rating: 1000° F

50-3066 Size: 6' X 6'
50-3068 Size: 6' X 8'
50-3072-12X12
Size: 12' X 12'

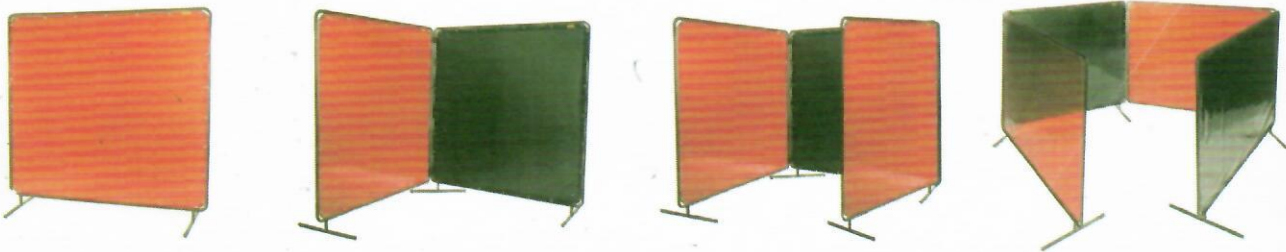

23 oz. Black Fiberglass
Acrylic / Neoprene
coatings
Temp rating: 1000° F

50-2366 Size: 6' X 6'
50-2368 Size: 6' X 8'
50-2372-8X12
Size: 8' X 12'
50-2372-12X12
Size: 12' X 12'

Shown below are examples of possible modular configurations with the potential for many more arrangements to fit your shop size or production floor.
